

TELEMAX™ EVO Accessories

The TELEMAX™ EVO Hybrid is supported by an extensive range of accessories that allow operators to tailor the platform to specific operational requirements. Available payloads include disruptor and firing system mounts, x-ray integration kits, inspection cameras, specialist grippers, breaching and access tools, towing devices, communications repeaters and mission-specific sensors. Together, these accessories expand the robot's capability across EOD, counter-IED, hazardous materials and public safety operations, enabling operators to safely investigate, access and neutralise threats while maintaining maximum stand-off from danger.

Positive solutions for complex requirements
